What Is CompWize?

SMP/CompWize team of Premium Auditors and Actuaries utilizes our proprietary, **AI-powered software** to identify statistical and human errors within workers' compensation premium calculations. We comprehensively analyze over 2000 data points correlating with these calculations, including but not limited to:

We are capable of independently reviewing over six years of workers' comp data, enabling businesses to recover any overcharges within that time-frame.

Workers' Comp Overcharges - Common Causes

- *Errors in Claims*
- *Subrogated Claims Negatively Inflating E-Mod*
- *Reserve Errors*
- *Employee Misclassifications*
- *Payroll Exclusions*

How Can CompWize Help Grow Your Book of Business?

While many of your current and potential clients may not be interested in the complexities of workers' comp premiums, they are interested in their bottom line. CompWize gives you additional tools to bolster your book of business, getting your foot in the door to prospective clients who are genuinely interested in this offering.

Access to High-Value Clients

You can now offer this to companies paying a minimum of \$40,000 in workers' comp premiums.

CompWize – Your Client Acquisition Catalyst

Your partnership with CompWize gives you an edge over the competition. You can take advantage of the “wedge” created by the refund of workers' comp recoveries and gain the ability to market other insurance programs to satisfied clients.

You can add clients by actually performing a service and achieving a result prior to AOR. This is a tremendous door opener that can add additional revenue to your bottom line with minimal effort on your part.

Cementing Current Client Relationships

CompWize provides your current clients with another intelligent reason to stay with you. It also provides valuable talking points for the next time you check in with them, further solidifying the relationship you've established.
